Garden by Hornval. Clever garden solutions!

Do you feel like you have green fingers?
Do you dream about your own organic
vegetables and herbs?
Do you like tidiness around your home?
Don't want grass and weeds to grow
around your trees?

If you have answered yes to any of the
above questions, it means that Garden
by Hornval products are for you.

Where does the idea for elements of small garden architecture come from?

We have been manufacturing steel roof
coverings and gutter systems for more
than 30 years. This has given us tools
and knowledge of how steel behaves in

various weather conditions. Therefore we
are still looking for new applications for
coated steel. This recyclable material is
perfect for producing solutions that sup-
port home garden crops or elements of
small garden architecture.

So what is the Garden by Hornval brand?

Garden by Hornval brand products are
made from steel with increased corrosion
resistance. You will find products that
organize the space around your home:
grass and wood edgings or products for
plant growing: vegetable gardens, but also,
how could it be otherwise, GI modular
panel sheet with a low embossed profile,
designed for small garden architecture.

What are the benefits of Garden by Horn- val products?

We have already written about the mate-
rial, but one benefit that distinguishes our
products in the small garden architecture
segment is their mobility. They are very
easy to assemble and each year you can
put them in another place. They can also
be folded for the winter and unfolded for
the summer in another location. Elements
are standardized and conveniently pack-
aged.

Discover our clever solutions for your
garden.

Easy installation

Easy and rapid installation using a rubber hammer, with no need to form the shape as with PVC borders.

Mobility

If you don't want to leave the vegetable garden during the winter, for example, in 5 minutes you can remove it and store it in the garage.

Durability without maintenance

Made from steel with increased corrosion resistance, so no maintenance is required.

Transport in your own car

We package garden elements in boxes and you can transport them by car.

EGO products

Garden by Hornval products are made from 100% recyclable steel.

Grass edging

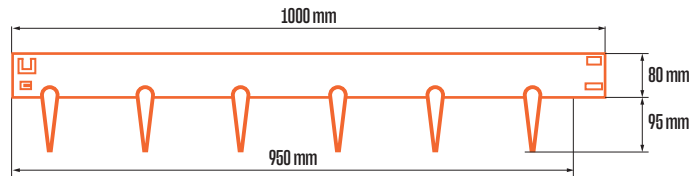

01

01 grass edging manufactured by Hornval are an excellent solution for the tasteful organization of your home or company surroundings.

Made from coated steel sheet, they are easy to install and remove and are durable and modern.

First of all, you can mark the limits of green areas yourself with ease.

All you need to do is to place the border in the intended place and drive it into the ground using a rubber hammer.

Wood edging

02

02 wood edgings create a frame around a tree or a bush preventing the grass and weeds from growing. They are manufactured in two variants and dimensions: two elements with a diameter of 0.6 m (**02A**) and three elements with a diameter of 0.9 m (**02B**). They have an elegant and modern look and, moreover, they prevent the grass and weeds from growing.

Vegetable gardens

03

03 Vegetable gardens are raised beds, perfectly suited to arrange your home vegetable garden or flower beds. Each garden consists of 4 panels and dowels. The gardens can be coupled together at a 90- or 180-degree angle – you only need to drive the dowels into the ground. The built bed can be filled with soil and planted however you like. Thanks to the modular solution and easy installation and removal, you can redesign the surroundings of your property each year.

Modular panel sheet

G1

The surroundings of your home are as important as the home itself. This is where you spend summer days and most often relax after work. Arbours, summer-houses and cottages deserve the best roof. G1 panel sheet is characterized by lower embossing to avoid overwhelming the small garden architecture.

Embossing height	Number of modules in 1 panel	Length of 1 element	Number of elements in a package	Number of m ² in a package
